WEB DEVELOPMENT PROGRAM

Learn to Build Real Websites From Scratch

A 14-week beginner-friendly program teaching the fundamentals of responsive web design through guided instruction, interactive lessons, and hands-on projects — no prior coding experience required.

What You'll Learn

- HTML and semantic web structure
- CSS styling and layouts
- Responsive design for mobile & desktop
- Flexbox and CSS Grid
- Accessibility & best practices
- Forms and user interaction
- Animations and visual effects
- Website design principles

Learn by Building

Every lesson pairs a short presentation with a hands-on coding activity. By the end, each student designs and builds their own personal portfolio website — and can complete the freeCodeCamp Responsive Web Design Certification.

Program Details

COST	FREE
DURATION	14 Weeks
SCHEDULE	1 Hour / Week
FORMAT	Live Guided Instruction
LEVEL	Beginner — No Experience Needed

Online Platform

Students get access to a learning platform to review lessons, track progress, and showcase completed projects in a student gallery.

Our Impact

Code-to-Create is already running through the DigiKazi program, helping students in Kenya learn web development and build their own websites.
